

2020 Florida Braille Challenge

The Land Before Braille existed billions of years ago and then it was gone, without warning. Many believe it was the *printa-sauras rex* that destroyed *dino dots* forever, while world renowned *paleodotantists* conclude that the calculating and cunning *veloci-printor* is the reason for the annihilation of the oversized reading system. Despite all the evidence and lack of evidence, one thing is certain, *dino dots* existed at one point allowing the *triceradot*, *perkins-o-dactyl*, *embossasaurus*, and many other ancient species to communicate and exist harmoniously throughout the vast lands in which they lived. Whether they were *brailivores*, *printivores*, or the rare *omni-mediavores*, they had a system that worked.

Once these dot-laden creatures were gone, there was no known system for modern day humans to read and write tactually - until *Brailleontologist*, Charles Barbier started uncovering the mysteries of *dino dots*. Though he was alone in his research and experiments for many years, he eventually earned the support of fellow *Brailleontologist*, Louis Braille who perfected the cloning process from *dino dots* found deep within the earth's crust. They stood by their belief that braille will find a way. Braille always finds a way!

Join FIMC-VI on a fossil dig to uncover the contractions lost forever, learn firsthand what *dino dung* holds within, and show the world why braille dots of today are readable only through tactile perception.

Join us - at Jurassic Braille!

January 24

West Florida ~ Tampa

New Beginnings Christian Church
4100 S. Manhattan Avenue
Tampa, 33611

February 7

East Florida ~ Orlando

Grace Covenant Presbyterian Church
1655 Peel Avenue
Orlando, 32806

Download student permission forms at
www.fimcvi.org/braille-challenge
or email sglaser@fimcvi.org

February 21

South Florida ~ Ft. Lauderdale

Arthur Ashe, Jr. Campus
1701 NW 23rd Avenue
Ft. Lauderdale, 33311

March 5

North Florida ~ Jacksonville

Jacksonville Public Library
303 N. Laura Street
Jacksonville, 32202
